Skills

Languages: Java, Python, C/C++, JavaScript, TypeScript, SQL,

Technologies & Tools: Node.js, React, MySQL, MongoDB, Git, GitHub, Docker, Postman, Linux, ReactJS, REST API

Work Experience

Content Executive

Institution of Engineers (India) - IEI Student Chapter

Nov 2025 – Present

- Create, edit, and manage technical and non-technical content for the student community.
- Develop written content for events, announcements, social media, and internal communications.
- Collaborate with core team members to ensure consistent messaging and timely content delivery.
- Contribute to improving engagement and visibility of club activities through structured content.

Skills Used: Content Writing, Copywriting, Communication

Education

Chitkara University Aug 2024 - 2028 B.E. in Computer Science and Engineering

Relevant Coursework: Object Oriented Programming, Databases, Discrete Maths, Data Structures and Algorithms, Operating Systems, Computer Networks, Machine Learning, Data Mining, Advance Data Structures and Algorithms, Image Processing, Calculus and Statical Analysis.

Project Work

- **Online Examination & Preparation Platform (2024):** Designed and developed a web-based assessment platform supporting quizzes, tests, and practice modules. Implemented role-based access for students and instructors, RESTful APIs for exam management and evaluation, and structured relational schemas for users, exams, and results. Focused on modular architecture and scalability. Spring Boot, React, REST APIs, MySQL, Git.
- **PULSE: Wearable Emergency Alert Device (2025):** Designed a wearable emergency and health-monitoring device capable of detecting abnormal pulse rates and sudden motion. Integrated GSM-based alert transmission to emergency contacts and focused on reliable hardware–software communication. ESP32, IoT, GSM (SIM800L), Sensors, Embedded Systems.
- **Veronica: Personal AI Assistant (2025):** Designed and developed a personal AI assistant capable of automating daily tasks and acting as a virtual Personal Assistant (PA). Implemented device control through system-level scripts and APIs, task handling such as reminders and information retrieval, and contextual command execution. Focused on modular design, automation workflows, and secure interaction with hardware and software components. AI Automation.
